

I have XM satellite radio in my car and have found it to be an asset while traveling. You do not lose radio stations as you get out of range and it has been wonderful to have traffic updates while on the road. I also like the fact that you can program a variety of different stations such as: weather, news, talk radio, etc. The quality of the XM Satellite is unsurpassed. I don't like the idea of some association determining what I can listen to in my car. I pay for this service and should be able to have what I want. I urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that I demand and deserve.
